Pediatric Dentistry: Clinical Advances and Practice Updates

Message from the Guest Editors

Pediatric dentistry is a branch of dentistry that deals with children from birth to adolescence. Pediatric dentists promote children's dental health and provide educational resources to parents. Doctors recommend a dental exam after your child's first tooth appears or before their first birthday. This is because early oral examinations can help detect early cavities. Early detection is crucial to maintaining oral health, changing abnormal habits, and making treatment needed as simple as possible. Pediatric dentistry focuses on preventing oral and dental injuries in children by focusing on dental care; caries risk assessment; and habits related to fingers, thumbs, and pacifiers. Pediatric dentistry as an art and science is constantly evolving, and with new developments and advances in the theory and practice of pediatric dentistry, the goal of providing quality dental care to all pediatric patients from birth to adolescence is achievable. This Special Issue of *JCM* aims to collect contributions from all aspects related to "Pediatric Dentistry: Clinical Advances and Practice Updates". Original research articles and reviews will be included.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
