Special Issue

Microsurgery: Current and Future Challenges

Message from the Guest Editor

Innovations such as robotic-assisted microsurgery or Artificial Intelligence, have the potential to change the whole field of microsurgery. But when transferring from bench to bedside, all of these innovations are facing the same obstacles: initially prolonged surgery time, concerns regarding patient safety, high costs or problems in patient selection- just to mention some of them. Some innovations are overcoming these hurdles, but many are failing to make the step into everyday clinical practice. This Special Issue focuses on challenges in microsurgery—because it is not about having a solution and creating a problem, but about having a problem and finding a solution. We are looking forward to receiving papers about your problems and solutions in microsurgery. Keywords

- microsurgery
- reconstruction
- reconstructive surgery
- breast reconstruction
- extremity reconstruction

Welcome to contribute papers, please click here to find more details.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
