

## Special Issue

# Diagnosis and Treatment of Brain Tumor

### Message from the Guest Editor

In recent years, advances in computer technology have led to dramatic advancements in diagnostic imaging, preoperative simulation, and intraoperative monitoring. In addition, genetic diagnosis and classification of gliomas have been further developed, and thus, outcomes can now be better predicted. Therefore, in order to collate the findings and insights of physicians and researchers and to help them in their future research, we aim to launch this Special Issue which will provide an update of the recent advancements in various aspects of brain tumors.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.
