

Special Issue

Review Special Issue Series: Recent Advances in Intensive Care

Message from the Guest Editor

Worldwide interest in the management of critically ill patients has escalated significantly in recent decades. In this regard, Critical Care Reviews are excellent means by which to share and summarize the art and fundamental science that support intensive care practice. Due to the nature of critically ill patient disease onset and clinical courses, the purpose of the present Special Issue is to publish high-quality scientific papers that address recent advances in several key aspects of critical care and are relevant to a broad range of research. The present Special Issue aims to promote developments in evidence-based practice for the therapy and management of critically ill patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
