

Special Issue

State-of-the-Art in Plastic Surgery

Message from the Guest Editors

Focusing on four key areas, this Special Issue addresses breakthroughs in breast reconstruction, trunk reconstruction, lower-extremity reconstruction, as well as the latest advancements in lymphatic surgery and gender affirmation surgery.

Our aim is to provide readers with a comprehensive understanding of cutting-edge developments in plastic surgery, with particular emphasis on innovative techniques and emerging trends. Readers can anticipate a wealth of information on advancements in breast reconstruction, examining the most recent techniques and technologies that have revolutionized the field. Trunk and lower-extremity reconstruction will also be explored in detail, shedding light on novel approaches to addressing complex challenges in these areas.

This Special Issue will highlight the latest developments in lymphatic surgery, offering insights into the evolving landscape of this specialized branch of plastic surgery. The inclusion of gender affirmation surgery adds a progressive dimension to the collection, presenting the most up-to-date information on procedures designed to support individuals in affirming their gender identity.
