Novel Therapeutic Strategies for Acute Myeloid Leukemia

Message from the Guest Editors

This Special Issue aims to present a detailed and up-to-date perspective on the dynamic field of AML treatment. It also focuses on how ongoing advancements in understanding AML biology are progressively leading to the development of novel drugs. At the same time, it underscores the role of supportive care, which is crucial to improving the quality of life of patients and their overall survival rates as well as managing their side effects, especially in such a fragile setting.
