Endometriosis: Clinical Challenges and Prognosis

Message from the Guest Editor

Endometriosis is among the most prevalent gynecologic diseases with estimated prevalence rates nearly 10% of women on reproductive age worldwide. Characterized by the presence of endometrial-like tissue outside the uterine cavity, this complex condition causes a vast range of symptoms in suffering women, including both physical and mental problems, which in turn, ameliorates their quality of life. Conventional treatments for endometriosis usually include medical and surgical treatments, although elevated rates of treatment failure has been observed. Therefore, there is a need to optimize current treatment regimens as well as to explore new therapeutics that could improve quality of life of those women unresponsive to conventional treatments. In this Special Issue, we invite researchers to contribute with manuscripts encompassing both clinical and preclinical studies, including but not limited to original articles, systematic reviews, meta-analyses, and study protocols. Submissions that utilize qualitative or mixed methods approaches to address unmet needs, identify barriers, or highlight research priorities are particularly encouraged.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
