Clinical Management of Patients with Heart Failure

Message from the Guest Editors

Heart failure is among the leading causes for increased morbidity and mortality worldwide. It evolves with repeated episodes of decompensation, representing one of the most frequent reasons for hospitalization at cardiology or internal medicine units, but also aggravating the course of other pathologies. The onset of heart failure is frequently subtle and unexpected. When patients seek specialized medical advice, it is often too late to obtain optimal results because several complications and associated co-morbidities are already present, and the most appropriate recommended management must be adapted to their clinical conditions. The new therapeutic methods have been developed. Starting with innovative drugs and continuing with invasive procedures, along with lifestyle change measures, selecting the most appropriate management strategy for heart failure is difficult, raising challenges for medical personnel and healthcare systems, while often leading to suboptimal results for the patient. This Special Issue focuses on original articles, reviews, meta-analysis referring to groundbreaking research regarding the clinical management of heart failure.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
