Segmentectomy and Lobectomy in Early-Stage Lung Cancer Management

Message from the Guest Editor

The surgical management of early-stage non-small cell lung cancer (NSCLC) has long regarded lobectomy as the standard of care. However, segmentectomy—an anatomical sublobar resection that preserves more pulmonary parenchyma—has gained increasing attention as an oncologically acceptable alternative for select patients. Segmentectomy offers the advantage of better postoperative pulmonary function while maintaining adequate oncologic control, particularly in small, peripherally located tumors. Conversely, lobectomy provides wider resection margins and facilitates more comprehensive lymph node dissection, reducing the risk of locoregional recurrence. This Special Issue aims to explore contemporary evidence and evolving perspectives on segmentectomy and lobectomy for early-stage NSCLC. We welcome submissions that provide novel insights, refine patient selection strategies, evaluate perioperative and long-term outcomes, or challenge existing paradigms in thoracic oncology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
