Updates on Embolization and Embolotherapy for Benign Prostatic Hyperplasia and Men's Health

Message from the Guest Editors

Benign prostatic hyperplasia (BPH) and associated lower urinary tract symptoms (LUTS) remain among the most common conditions impacting men's health worldwide. Prostatic artery embolization (PAE) has emerged as a minimally invasive, organ-sparing treatment option, with growing evidence supporting its safety, efficacy, and durability across a broad spectrum of patients. We aim to feature state-of-the-art reviews and original research addressing: updates in the PAE literature and Level 1 evidence; patient selection and clinical outcomes; complication prevention and management; PAE in complex clinical settings such as prior or planned radiotherapy for prostate cancer; radiation exposure and safety in outpatient practice; and anatomic variants and rare arterial patterns relevant to PAE planning and technique. Additional topics will include the role of PAE as an adjunct to minimally invasive surgical therapies, comparative data and particle technologies, quality-of-life outcomes, and future directions in image-guided men's health interventions. We welcome original research articles, systematic reviews, technical notes, and illustrative case series aligned with this scope.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
