

Special Issue

Pre-Hospital and In-Hospital Emergency Care Research

Message from the Guest Editors

Pre-hospital and Emergency Care has a direct impact on outcomes for time-critical conditions, and research in this area is urgently needed. From a global perspective, improvements in pre-hospital and emergency care has the potential impact more than 30 million time-sensitive conditions annually. In particular, Emergency Care requires a systems approach incorporating a population health perspective, which involves the delivery of essential clinical services in a timely manner. In this Special Issue, we welcome authors to submit papers on research relating to pre-hospital and in-hospital emergency care from various perspectives, including population health, clinical services research, prevention, diagnosis, treatment, rehabilitation, and many others.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
