

## Special Issue

# Clinical Therapeutic and Management Strategies for Epilepsy

### Message from the Guest Editor

The quality of life (QOL) of children suffering from childhood epilepsy may be associated with clinical and social variables. Among these variables, seizure severities, including frequent seizures and status epileptics, have been identified as important predictors of QOL. In addition, frequent interictal epileptiform discharges (IEDs) on EEG may also accompany transient cognitive/behavioral impairments. Moreover, frequent seizures and/or IEDs may play a role as mediators of emotional responses including stigma and fatigue. Though children with epilepsy do not always exhibit neuropsychological problems, seizure severities and IEDs on EEG may be associated with neuropsychological impairments. To prevent these disturbances, we should appropriately treat patients to suppress seizures and EEG abnormalities as early as possible. There is thus a need for the development of antiseizure medications with novel mechanisms of action that have the potential to improve outcomes. This Special Issue aims to highlight recent advances in the context of QOL-related factors, treatment, and the therapeutic management and strategies for children with epilepsy.

### Guest Editor

Dr. Hideaki Kanemura

Department of Pediatrics (Sakura), Toho University, Shimoshizu 564-1, Sakura 285-8741, Japan

### Deadline for manuscript submissions

closed (3 July 2024)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
