Peripheral Nerves: Imaging, Electrophysiology and Surgical Techniques

Message from the Guest Editors

According to the World Health Organisation, 22% of primary care patients worldwide suffer from such intense pain that it impairs their capacity to carry out regular activities. Experiencing long-lasting pain can have harmful consequences for both physical and emotional health. Collaborative efforts involving musculoskeletal radiologists, neurologists, neurosurgeons, orthopedists, and physiatrists are crucial for accurately diagnosing and treating neurological pain resulting from nerve compression, trauma, and tumors. Peripheral nerve entrapments in the limbs can occur due to multiple factors and manifest at different levels of severity. Peripheral nerve injuries originating from accidents can lead to substantial impairment and greatly affect individuals' lives. Early evaluation, precise and immediate intervention, and attentive oversight are all critical. Peripheral nerve tumors, which are primarily benign, are uncommon in adults without pre-existing health issues. Neurofibromas and schwannomas are separate types of tumors that can occur alone or together with neurofibromatosis (NF).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
