

Special Issue

Current and Emerging Treatment Options in Shoulder, Hip and Knee Arthroplasty

Message from the Guest Editor

This Special Issue aims to explore the current and emerging treatment options for shoulder, hip, and knee arthroplasty. This Special Issue provides a platform for researchers, clinicians, and experts to share their insights, experiences, and research findings related to innovative treatment approaches in arthroplasty. We invite original research articles, systematic reviews, and meta-analyses that focus on various aspects of shoulder, hip, and knee arthroplasty. The scope of this Special Issue includes, but is not limited to: 1. Surgical techniques and approaches in joint replacement; 2. Implant design and materials; 3. Rehabilitation and post-operative care; 4. Patient outcomes and satisfaction; 5. Complications and their management. We encourage submissions that present novel ideas, evidence-based practices, and clinical studies that contribute to the advancement of arthroplasty. However, please note that we will not be accepting mini reviews or case reports for this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
