Colorectal Surgery: Current Practice and Future Perspectives

Message from the Guest Editor

Colorectal surgery, which includes procedures involving the colon, rectum, and anus, is a critical field in the treatment of various gastrointestinal disorders, including colorectal cancer, diverticulitis, inflammatory bowel disease, and more. Advances in surgical techniques have significantly improved patient outcomes, reduced recovery times, and minimized complications. Among the key developments in this field are the contrasting approaches of minimally invasive surgery, including laparoscopic and robotic-assisted techniques. In contrast, minimally invasive surgery employs smaller incisions, specialized instruments, and sometimes robotic assistance to perform the same procedures with greater precision. These techniques have been associated with reduced postoperative pain, quicker recovery, and better cosmetic outcomes. We hope to investigate all aspects of colorectal surgery. We await receiving original articles, reviews, systematic reviews, meta-analyses, and clinical research. With this Special Issue, we aim also to provide a 'view' of the current practice and future perspectives of colorectal surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
