Advances in Orthopedic Trauma Surgery in Geriatrics

Message from the Guest Editor

Despite recent advances in implant designs and surgical techniques, the management of geriatric fracture patients is still challenging because of their high prevalence of comorbidities and frailty. Although the standardized geriatric comanagement of trauma patients has resulted in a significant reduction in postoperative morbidity and mortality, much of our current care is still not optimal. This Special Issue focuses on novel approaches to peri-operative care, fracture surgery, medical care, rehabilitation and secondary fracture prevention. Because the modern treatment of geriatric trauma patients is multi-professional, we invite authors from all professions involved in the treatment of geriatric patients to submit appropriate manuscripts.

Guest Editor

Prof. Dr. Ulrich Christoph Liener

Department of Orthopedics and Trauma Surgery, Marienhospital, 70199 Stuttgart, Germany

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
