Innovations in Breast Cancer Surgery: Advancing Treatment Paradigms

Message from the Guest Editor

The *Journal of Clinical Medicine* is thrilled to announce a Special Issue dedicated to the latest developments in the surgical treatment of breast cancer. We invite authors to submit original research and review articles shedding light on innovative oncoplastic surgical techniques, advancements in reconstructive surgery, robotic nipple sparing mastectomy, deescalation of breast cancer surgery strategies such as targeted axillary dissection, and wire-free localisation techniques for non-palpable breast and axillary lesions. This Special Issue aims to provide a comprehensive overview of the evolving landscape of surgical interventions for breast cancer, including minimally invasive procedures, novel biomaterials, and emerging technologies. Authors are invited to submit their manuscripts through the journal's online submission system. Submissions will undergo a rigorous peer review process to ensure the highest quality and relevance to our readership. Do not miss this opportunity to contribute to the advancement of breast cancer surgery and submit your work to the *Journal of Clinical Medicine's* Special Issue today!
