Clinical Progress in Microsurgical Reconstruction

Message from the Guest Editor

Microsurgery is a fundamental cornerstone of the armamentarium of a reconstructive surgeon, such as lymphedema and reconstructive needs like genital gender-affirming surgery, which is essential for a patient's self-perception and social life. The aim of this Special Issue is to emphasize these improvements through the publication of papers addressing the above topics with solid scientific evidence. Basic research papers, clinical papers and reviews focused on clinical progresses in microsurgical reconstruction are all highly encouraged for submission. Keywords:

- microsurgery
- supermicrosurgery
- microvascular anastomosis
- head and neck reconstruction
- oro-maxillofacial reconstruction
- plastic and reconstructive surgery
- limb reconstruction
- breast reconstruction
- genital reconstruction
- lymphedema
- lymph nodes transfer
- facial reanimation

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
