Sepsis: New Insights into Diagnosis and Treatment

Message from the Guest Editors

Sepsis represents a life-threatening condition with a huge impact on health care costs. Further, Sepsis is a “time-dependent” disease; the outcome is highly influenced by the prompt detection and efficiency of the management, even from the very “first hour”. Due to the centrality of the complex interactions between the infectious insult and the host's immune response, a deeper understanding of the mechanisms involved in the dysregulation host response is mandatory.

Interestingly, It is now clear that the individual genomic profile is partly responsible for the interindividual variability of the clinical evolution of sepsis. In light of this evidence, immunomonitoring and immunotherapy have gained increasing recognition in recent decades.

Unfortunately, until now, evidence has not supported the extensive introduction of adjuvant therapy in current clinical practice. In this Special Issue, we invite researchers and clinicians to submit their work, including original clinical research studies, meta-analyses, and systematic reviews, that will provide additional insight on the diagnosis and treatment of septic shock.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
