Neuroendocrine Tumors: Challenges and Future Perspectives (Second Edition)

Message from the Guest Editors

Neuroendocrine tumors (NETs) are a family of neoplasms of increasing incidence and prevalence worldwide. Their heterogeneity in terms of biological aggressiveness, variegated site of origin and capability to potentially produce hormonally active substances poses unique challenges for clinical management. NETs are characterized by the peculiar and frequent expression on the cell surfaces of somatostatin receptors, which represents the ideal target for therapy (i.e., somatostatin analogues (SSAs) and peptide-receptor radionuclide therapy (PRRT)). Few chemotherapy schemes are currently part of the therapeutic armamentarium. However, regardless of the huge number of clinical trials and many promising new drugs, the only approved targeted agents for advanced progressive NETs are everolimus and sunitinib (the second one only for those of pancreatic origin). Additionally, despite great efforts in the search for innovative biomarkers, only few validated biomarkers are available thus far. Following the success of the first volume of the Special Issue, a second volume is announced here with the aim to highlight recent advances in NETs.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
