Clinical Advances in Head and Neck Cancer Diagnostics and Treatment

Message from the Guest Editors

Head and neck cancer presents an uncountable number of challenges for patients and practitioners. Prognosis remains poor, with many patients experiencing locoregional recurrence and distant metastases.

Moreover, multimodality therapy often results in severe functional impairments and toxicities related to tumor extirpation, reconstruction, chemoradiotherapy, and immunotherapy. Despite this, diagnostic and treatment advances continue to improve oncologic and functional outcomes for this population. This Special Issue presents an opportunity to review the current landscape of head and neck cancer therapeutics, with a focus on diagnostic, surgical, and reconstructive improvements in the field. Topics of interest include the following: tumor biomarkers, radiomics, surgical margin analysis, artificial intelligence, and novel surgical and reconstructive techniques. We look forward to your contributions and advancing our collective knowledge in the diagnosis and multidisciplinary care of head and neck oncology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
