

Special Issue

Clinical Management, Diagnosis and Treatment of Thoracic Diseases

Message from the Guest Editors

Thoracic diseases are among the most relevant and frequent pathologies in several areas of both the medical and surgical fields. In recent years, a change in the epidemiology of pulmonary diseases has occurred, with great interest in the field of infectious diseases. New diagnostic tools have made it possible to perform increasingly specific diagnoses. Moreover, new therapeutic options in both the medical and surgical fields are modifying the prognosis of some pathologies (e.g., neoplastic diseases). This Special Issue is aimed at all specialists involved in the management of lung diseases, and aims to highlight new diagnostic and therapeutic options in the field of chest diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
