

Special Issue

Current Strategies and Future Directions in Menopause Management

Message from the Guest Editor

The journal JCM launched a Special Issue titled "Current Strategies and Future Directions in Menopause Management". Women's health related to menopause has been given a lot of visibility in recent years. Although menopause is a natural phenomenon, one third of women will experience a pathological experience. The poorer quality of life is accompanied by other medical consequences of estrogen decline: osteoporosis, cardiovascular disease and cognitive decline. Moreover, most postmenopausal women will suffer from the late consequences of hypoestrogenism on their genitourinary tissues. On the other hand, treatments for the relief of the symptoms and consequences of menopause are gaining in efficacy and safety, although new data are always needed. This special issue aims to update knowledge about women health aspect related to menopause. We would like to invite you to publish original clinical research articles or systematic reviews focused on the diagnosis, prevention and treatment of processes that worsen women's quality of life, menopausal therapies, or sexuality that will provide gynecologists and family physicians readers with a tool to update their knowledge on this topic.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
