As the field of IBD research continues to evolve, there is a growing recognition of the importance of incorporating patient perspectives and experiences into clinical care and research. Patient Reported Outcomes (PROs) offer invaluable insights into the real-world impact of IBD on individuals’ lives, encompassing aspects such as symptom burden, quality of life, treatment satisfaction, and functional status. Understanding PROs is crucial for optimizing patient-centered care, enhancing treatment decision-making, and evaluating the effectiveness of interventions across diverse populations and healthcare settings.
