

Special Issue

Trauma and Acute Care Surgery Research: Innovations, Challenges, and Future Directions

Message from the Guest Editor

In this Special Issue clinical and basic science advances and summaries of the current state of the art related to trauma care will be summarized from nationally known trauma care experts, and the current state of trauma system development will be provided both in the US and internationally. Trauma care is in a constant state of evolution, and it is important for trauma care practitioners to be alert to the best available evidence so as to provide optimal care for their patients. This Special Issue on trauma care will provide the most up-to-date information on best practices for taking care of the severely injured trauma patient.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
