From Endocrine Tumors Requiring Surgery to Endocrine Issues of Different Surgical Conditions

Message from the Guest Editors

The domain of endocrine tumors is heterogeneous, requiring a multidisciplinary panel of investigations and approaches. The majority of cases diagnosed with endocrine tumors are referred to a surgical team in order to achieve the cure of the condition. That is why pre-operative findings are essential to locate the tumor and to provide genetic testing and hormonal work-up for a better outcome. Our objective is to capture the essence of these aspects. Thus, we invite you to contribute papers for this Special Issue. We are particularly interested in: adrenal tumors with functioning or non-functioning profiles and associated co-morbidities; unusual complications of traditional pituitary tumors; complex aspects of parathyroid and thyroid neoplasia; as well as a bridge from an endocrine-surgical perspective to neuroendocrine tumors. Moreover, unexpected endocrine issues such as adrenal hemorrhage, acute adrenal insufficiency or clotting-related hypopituitarism amid different surgical procedures are of interest for this Special Issue, in addition to unusual endocrine locations (tumor-like lesions) at the level of endocrine glands such amyloid, lymphoma, and metastasis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
