The Rebirth of Ventral Skull Base Surgery through Multiportal Approaches: Endonasal, Transorbital, Transmaxillary and Transoral Routes

Message from the Guest Editors

The last few decades were marked by remarkable progress in skull base surgery. In this scenario, starting from the experience acquired from transsphenoidal surgery together with the constant improvements of anatomical knowledge, it led to the development of several alternative ventral routes to reach the more inaccessible skull base regions. Those ventral skull base routes, such as the transorbital corridors and the transoral-transmaxillary access, were explored to complement the endonasal approach shaping the concept of multiport skull base surgery. This Special Issue focuses on research articles and reviews with a high level of scientific rigor. The topics covered include innovative surgical approaches, challenging surgical indications, technical nuances, emerging technologies, perioperative care, patient outcomes, and complementary treatment in the context of interdisciplinary collaboration. This sum of the research aims to serve as a resource for all the healthcare professionals, researchers, and students interested in the field of cerebrovascular and skull base surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
