The Diagnosis and Treatment of Endometriosis

Message from the Guest Editor

Endometriosis is a complex medical condition that affects a large group of women worldwide. The most important disorders of the endometriosis spectrum are subfertility and infertility. It is estimated that one-third of women with endometriosis will be infertile, and half of those who are infertile will have endometriosis. The pathogenetic relationships and mechanisms linking these two disorders are largely unclear. The effectiveness of treatment of endometriosis-related infertility is impacted by the complexity of concomitant health problems and the limitations of the methods available. The fundamental goal always remains the same: to discover and effectively treat any underlying health problems to resolve them. This Special Issue will delve into the crucial role of imaging techniques in diagnosing endometriosis and planning optimal treatment. Join us as we embark on a journey through the lens of medical imaging to illuminate the path towards improved diagnostics and treatment in the realm of endometriosis and reproductive issues. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
