Medical and Surgical Management of Urinary Tract Diseases (Second Edition)

Message from the Guest Editor

Nowadays, urinary tract diseases, such as renal or ureteral stones, as well as tumors or polyps in the upper urinary tract, can be treated in a conservative fashion. The prevalence of urolithiasis is increasing worldwide, partly due to dietary modifications such as increases in the consumption of sodium, animal proteins, and refined sugar and decreases in the intake of fiber. On the other hand, bladder cancer and upper tract urinary carcinoma (UTUC) are two diseases that can be treated in a conservative way (i.e., with laser ablation) depending on several factors. The arrival of minimal invasive treatments and new technologies is focused on reducing patient morbidity and performing more efficient procedures. Recent innovations include new single-use flexible endoscopes and laser technologies. Following on from the success of the Special Issue titled “[Medical and Surgical Management of Urinary Tract Diseases](#)”, this second volume aims to continue providing new insights into the medical and surgical management of urinary tract diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
