Atrial Fibrillation and Its Complications: Preventive Strategies and Relative Evidence

Message from the Guest Editor

Atrial fibrillation is the most common cardiac arrhythmia in clinical practice, with a rising incidence and prevalence globally. AF represents an increasing healthcare issue due to the multiple potential associated complications, including a 5-fold increase in stroke and heart failure and 2-fold increase in myocardial infarction, as well as dementia and cognitive decline. Over the past decade, several therapeutic strategies have emerged in clinical practice, with the aim of preventing such complications. Oral anticoagulation reduces the risk of ischemic stroke by almost 70% but is associated with bleeding risk. Percutaneous left atrial appendage closure is a valuable alternative therapeutic strategy for stroke prevention in patients with AF at an increased risk of bleeding. Anti-arrhythmic drugs and catheter ablation are effective in reducing the AF burden and improving patients' quality of life. We are pleased to invite you to submit original research papers or reviews focusing on preventive strategies for AF and its complications, emphasizing both the supporting evidence and limitations related to current pharmacological and interventional approaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
