Optimizing Outcomes in Pancreato-Biliary Care: Integrating Technology, Technique, and Personalized Approaches

Message from the Guest Editor

Pancreato-biliary (PB) diseases remain among the most complex areas of digestive health, requiring high-level expertise, rapid decision-making, and coordinated multidisciplinary care. While major advances in hepato-pancreato-biliary surgery, interventional endoscopy, and interventional radiology have expanded therapeutic options, outcome variability persists. Innovation alone is not sufficient: true progress occurs when technology, refined technique, and personalized care are integrated into cohesive pathways. Minimally invasive pancreatic surgery, EUS-guided interventions, robotics, advanced imaging, and AI-assisted diagnostics are reshaping PB practice. However, their impact depends on thoughtful implementation, structured training, and careful patient selection. Parallel to this, the shift toward personalized and value-based care—including multidisciplinary boards, tailored peri-interventional management, and patient-reported outcomes—is improving recovery, safety, and long-term quality of life. This Special Issue focuses on how synergy across disciplines and approaches can optimize PB outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
