Hospital-Acquired Infections: Evolving Threats and Epidemiological Insights

Message from the Guest Editor

Hospital-acquired infections are a major global challenge, significantly impacting patient outcomes and clinical care across healthcare systems. This Special Issue aims to present cutting-edge research and practical insights into the evolving epidemiology and clinical impact of HAIs. We invite submissions that utilize hospital-based data, evaluate infection prevention strategies, or apply novel and interdisciplinary approaches to reduce transmission and improve patient safety at the point of care. We particularly welcome studies that inform clinical decision-making, track resistance mechanisms, and support outbreak response. Clinical investigations into the role of antimicrobial stewardship, infection control practices, and healthcare infrastructure in shaping HAI outcomes are also encouraged. The Special Issue seeks to connect global epidemiological trends with clinical implications across diverse care settings. By combining data-driven epidemiology with clinical practice, the collection aims to support evidence-based strategies that improve patient care and reduce complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
