An Update on Retinal Diseases: From Diagnosis to Treatment

Message from the Guest Editors

The recent advancements in medical technology have enabled us to disclose the etiologies of several common and rare retinal diseases, and some new diagnostic criteria and treatment modalities have been developed to date. We have come to understand those retinal disorders in depth and work better to provide care for patients. It is always exciting and important to accumulate new information about diseases for the future of medicine. At the same time, gathering and reviewing the latest knowledge is also useful for better understanding diseases. For this Special Issue, we invite original articles and review papers regarding the diagnoses and interventions of any retinal disorders, which will serve the readers in this field to better manage patients with those pathologies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
