Special Issue

Endovascular Surgery: State of the Art and Clinical Perspectives

Message from the Guest Editors

Endovascular surgery has transformed the management of aortic pathologies, offering less invasive alternatives to traditional open surgical methods, particularly for thoracic, thoracoabdominal, and aortic arch pathologies. However, the increasing complexity of cases is highlighting the need for continued innovation. Endoleaks continue to represent a significant clinical challenge, requiring advanced imaging and treatment strategies. In the case of aortic arch endovascular surgery, the development of branched and fenestrated endografts has greatly improved the possibilities for treating these complex lesions without the need for open surgery, although neurological complications still prove to be the Achilles' heel in these procedures. Similarly, spinal cord ischemia still poses a problem when we are dealing with pathologies involving the thoracic and thoracoabdominal aorta, highlighting the need for new strategies to mitigate these risks. The future of aortic endovascular surgery lies in refining these techniques while addressing clinical and regulatory challenges. We look forward to receiving your contributions.

Guest Editors

Dr. Andrea Xodo

Vascular and Endovascular Surgery Unit, "San Bortolo" Hospital, AULSS8 Berica, 36100 Vicenza, Italy

Dr. Francesco Squizzato

Vascular and Endovascular Surgery Division, Department of Cardiac, Thoracic, Vascular Sciences and Public Health, Padua University, Padua, Italy

Deadline for manuscript submissions

9 October 2025

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
