Clinical Outcomes of Glaucoma Surgery: Visual Acuity, Effectiveness and Quality of Life

Message from the Guest Editors

Glaucoma surgery continues to evolve with the goal of preserving vision, preventing disease progression, and improving patient quality of life. This Special Issue focuses on the clinical outcomes of both traditional and modern glaucoma procedures, including trabeculectomy, bleb-forming devices, minimally invasive glaucoma surgery (MIGS), and combined cataract–glaucoma surgeries. We welcome studies that evaluate postoperative visual acuity, intraocular pressure control, complication profiles, long-term surgical success, functional vision, and patient-reported quality-of-life outcomes. Real-world data studies, clinical trials, cohort studies, surgical technique evaluations, and evidence-based reviews—those that provide practical insights for ophthalmologists and glaucoma specialists—are particularly encouraged. The aim is to support clinicians in selecting, optimizing, and personalizing surgical approaches for diverse patient populations.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
