Clinical Updates on Cardiac and Vascular Toxicities from Antineoplastic Drugs and Beyond

Message from the Guest Editor

With the improvement in cancer prognosis due to advances in antitumor therapeutic protocols and new targeted and immunotherapies, we are witnessing a growing increase in survival; however, at the same time, an increase in morbidity among cancer survivors as a consequence of the increased cardiovascular adverse effects of antineoplastic drugs has also been observed. Common cardiac and vascular complications of antineoplastic therapies may include arrhythmias, myocardial ischemia, and left ventricular dysfunction culminating in heart failure, as well as vascular complications with arterial hypertension, thromboembolic events, and accelerated atherosclerosis. In this Special Issue, we welcome authors to submit papers on clinical aspects in terms of prognosis, diagnosis, and treatment, as well as the novel mechanisms that are implicated in antineoplastic drug-induced cardiac and vascular toxicity.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
