

Special Issue

Prevention and Treatment for Pelvic and Relative Diseases

Message from the Guest Editor

Current medicine focuses on developing diagnostic tools and treatment for life threatening conditions such as neoplasms or infectious disease, which is one of the greatest challenges faced by society today.

Nevertheless, we cannot forget about other population diseases that affect wellbeing, self-esteem and quality of life, such as pelvic and pelvic floor diseases. Uro-gynecological problems such as pelvic organ prolapse, urgency, stress urinary incontinence, fecal incontinence and surgery complications affect a significant population of women, as it is estimated that over 30% of adult females suffer from one of these conditions. Deep infiltrating endometriosis, adenomyosis, myomas causing pelvic pain syndrome and abnormal bleedings complete the picture of the problems that influence the everyday life of affected women. Therefore, it is of high importance to carry out research concerning the prevention, risk factors and diagnostic tools associated with these diseases, as well as appropriate treatment for patients. I am sure that your participation in this Special Issue will significantly contribute to the advancement of medical knowledge in the pelvic diseases field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
