

Special Issue

Clinical Diagnosis and Management of Neonatal Diseases

Message from the Guest Editors

As the field of neonatology continues to evolve, we invite researchers to submit their original manuscripts to our Special Issue dedicated to the diagnosis and management of neonatal diseases. We welcome high-quality studies across a range of topics, including but not limited to neonatal care, preterm birth, neonatal respiratory and cardiovascular management, neurodevelopmental outcomes, and point-of-care ultrasound for neonatal conditions. Our goal is to highlight research that can inform clinical practice and improve outcomes for the most vulnerable patients. In this Special Issue, we encourage clinical research that provides new insights into the diagnosis, treatment, and care of neonates, with an emphasis on improving long-term health and development. Submissions will undergo a rigorous peer-review process. We warmly welcome researchers to contribute their work to this issue and look forward to receiving your innovative and impactful submissions.

- neonatal intensive care
- low birth weight
- point-of-care ultrasound
- neonatal monitoring

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
