Targeted Medicine in Postoperative Pain Management

Message from the Guest Editors

This Special Issue, "Targeted Medicine in Postoperative Pain Management," aims to provide a comprehensive platform for the latest advancements and innovations in the field of postoperative pain management. This collection seeks to explore targeted therapeutic approaches, precision medicine, and personalized interventions aimed at optimizing pain control and patient outcomes following surgical procedures. This Special Issue welcomes original research articles, reviews, and clinical studies focusing on novel pharmacological agents, precision drug delivery systems, and individualized treatment regimens for postoperative pain. By fostering a deeper understanding of targeted medicine in postoperative pain management, this Special Issue endeavors to advance clinical practice and improve the quality of care for surgical patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
