

Special Issue

Advances in Clinical Cardiovascular Magnetic Resonance Imaging

Message from the Guest Editors

We are delighted to launch a Special Issue of the Journal of Clinical Medicine entitled “Advances in Clinical Cardiovascular Magnetic Resonance Imaging”.

Due to its comprehensive nature and ability to provide valuable information regarding different aspects of heart health, cardiovascular magnetic resonance (CMR) has evolved into an indispensable tool in the realm of cardiology.

CMR data could also be combined with data from other image modalities, as well as clinical data, to enhance cardiac disease characterization and personalize the patient’s therapeutic path.

Readers will gain insights into the current state of the art in the clinical applications of CMR imaging, understanding its role in improving patient care and risk stratification. Furthermore, the issue will explore exciting new developments and achievements in the field of CMR imaging.

We welcome the submission of original research and review articles. Topics of interest include, but are not limited to, the following keywords.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
