Clinical Updates on Hereditary Hemorrhagic Telangiectasia (HHT) and Other Vascular Diseases

Message from the Guest Editor

Hereditary hemorrhagic telangiectasia (HHT) is listed in both the capillary (telangiectasia subgroup) and the arteriovenous malformation (AVM) groups in the 2018 classification from the International Society for the Study of Vascular Anomalies (ISSVA). The diagnosis of HHT remains a challenge, as it is a rare disease (with a prevalence of 1:5000–1:10,000) with age-related penetrance of its multisystemic symptoms. The average diagnostic time lag (the interval between the first symptoms and the diagnosis of HHT) is still almost three decades for probands and only somewhat shorter for at-risk family members. Other vascular diseases resembling more or less HHT, especially the capillary malformation-arteriovenous malformation (CM-AVM) syndromes 1 and 2 (caused by RASA1 and EPHB4 mutations, respectively), are even less prevalent (approx. 1:100,000). Considering the clinical and genetic peculiarities of the above conditions, their diagnosis and therapy are the subject of extensive research. Groups from all clinical specialities are encouraged to submit their original research and review manuscripts to this Special Issue of the Journal of Clinical Medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
