Clinical Management of Skin Infections

Message from the Guest Editor

Clinical skin and soft tissue infections are very common. Due to the structural and functional characteristics of the skin, the diseases caused by its infection are more complex. In recent years, with the aging of the population and changes in lifestyle, as well as the deepening of relevant basic and clinical research, the mode of skin and soft tissue infections has changed. The status of community-acquired methicillin-resistant *Staphylococcus* (CA-MRSA) and other drug-resistant bacteria should not be ignored. As MRSA and other drug-resistant bacteria in the skin may become an important source of systemic infection, it is necessary to strengthen the monitoring of this aspect. In conclusion, infectious dermatosis is a challenging problem faced by dermatologists. In clinical work, paying attention to the role of infection in the occurrence of diseases is important to improve the level of prevention and treatment of skin diseases. This Special Issue aims to provide new information pertaining to the etiology, examination and treatment of various skin and soft tissue infections. It will also focus on the monitoring, prevention and treatment of drug-resistant bacteria (including MRSA).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
