Clinical Highlights in Uveal Melanoma

Message from the Guest Editors

The progress made regarding uveal melanoma therapy in recent years is noticeable. The availability of and advances made in the development of diagnostic and visualization devices has improved diagnostics. New strategies and improvements in radiotherapy and surgery techniques have enhanced treatment outcomes. The application of artificial intelligence offers hope for the better recognition of the disease and its prognosis. Clinical and laboratory observations along with basic science experiments help us to better understand the nature of the disease; however, uveal melanoma is still the most common primary intraocular tumor in adults, constituting a cause of visual impairment, blindness and even death. In this Special Issue, we welcome authors to submit papers on the clinical highlights in uveal melanoma, which will ensure that knowledge of this serious and challenging condition is up to date.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
