Clinical Highlights in Uveal Melanoma

Message from the Guest Editors

The progress made regarding uveal melanoma therapy in recent years is noticeable. The availability of and advances made in the development of diagnostic and visualization devices has improved diagnostics. New strategies and improvements in radiotherapy and surgery techniques have enhanced treatment outcomes. The application of artificial intelligence offers hope for the better recognition of the disease and its prognosis. Clinical and laboratory observations along with basic science experiments help us to better understand the nature of the disease; however, uveal melanoma is still the most common primary intraocular tumor in adults, constituting a cause of visual impairment, blindness and even death. In this Special Issue, we welcome authors to submit papers on the clinical highlights in uveal melanoma, which will ensure that knowledge of this serious and challenging condition is up to date.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
