Developments and Challenges in Liver Transplantation

Message from the Guest Editor

Liver transplantation is one of the main treatments for end-stage liver disease and has made significant progress in recent years. The introduction of new surgical techniques, immunosuppressive drugs, and organ preservation methods has improved the success and survival rates of liver transplantation. However, the problem of donor shortage still exists, and the long-term use of immunosuppressive drugs may lead to side effects and complications. In addition, postoperative care and complication management are critical to patient recovery and survival. This Special Issue will summarize improvements in liver transplantation techniques, donor shortage issues, immunosuppression and rejection, and postoperative care and complication management. This Special Issue aims to promote scholarly communication and provide valuable information to physicians, researchers, and patients. We invite researchers working in the field of liver transplantation and related areas to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
