

## Special Issue

# Challenges and Opportunities in Limiting Abdominal Aortic Aneurysm Growth

### Message from the Guest Editors

Abdominal aortic aneurysm (AAA) is an important cause of morbidity and mortality worldwide. AAA management is directed mainly by aneurysm size during subsequent periodic surveillance imaging. A threshold diameter of 55 mm has been widely used to treat AAAs, either endovascularly or by open repair. There has been continuous research during the past decade to investigate medical treatments that may limit AAA growth. First, there were several preclinical studies, followed by a small wave of clinical trials in humans.

This Special Issue aims to provide an update of research being undertaken to identify methods of reducing the rate of AAA growth, including perceptions of some of the challenges experienced in this research and current investigations on identifying treatment targets to limit AAA growth. Accordingly, this Special Issue will try to provide a forum for high-quality original research and review articles to showcase the most recent advances in limiting abdominal aortic aneurysm growth.

**Keywords:** abdominal aortic aneurysm; aneurysm growth; limit aneurysm growth; medical therapy

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
