

Special Issue

Diagnosis and Management of Acute Respiratory Distress Syndrome in the ICU

Message from the Guest Editor

Current medical practice is moving toward precision medicine. Advances in our understanding of the pathophysiology of ARDS have enabled the identification of clinical subphenotypes, the development of tailored therapies, and a more accurate prediction of prognosis.

Ever since the first reports, ARDS was identified as a heterogeneous syndrome, associated with variable mechanical and gas exchange disturbances. This clinical and biological heterogeneity contributes substantially to the complex management of the syndrome. Although the standard treatment remains mechanical ventilation support, several adjuvant or rescue therapies have been proposed over the years. A tailored strategy of lung recruitment and protective mechanical ventilation should be promoted, informed by bedside physiology and supported by recently published data.

This Special Issue aims to improve the clinician's approach to diagnosis, management, and the prediction of prognosis for patients with ARDS.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
