New Advances in Cardiorenal Syndrome

Message from the Guest Editor

Cardiorenal syndrome has become a pressing issue as far as hospitalizations are concerned, even those for chronic heart failure alone incur a subsequent increased risk for end-stage renal disease (ESRD) later on. In 2008, a classification of cardiorenal syndrome was introduced, approved by the American Heart Association in 2019, this classification clearly having improved the standards of cardiorenal syndrome. However, validation studies of this classification are lacking, the clinical applicability is questioned, and new developments in the area of cardiorenal syndrome, such as the role of infection, need to be considered. In a new Special Issue on cardiorenal syndrome, the *Journal of Clinical Medicine* summarizes new advances in the understanding of the cardiorenal syndrome, highlighting the description, pathophysiological underpinnings and pathomechanisms, every published article expected to add knowledge to the overall picture of cardiorenal syndrome and its therapeutic implications.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.5 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
