Current Advances in Glaucoma as Progressive Neuropathic Disease

Message from the Guest Editors

Glaucoma, an optic neuropathy, shares several epidemiological features and mechanisms with other neurodegenerative conditions. Although not all molecular mechanisms underlying the retinal ganglion cell (RGC) death are known, intraocular pressure (IOP), for some time, was considered the only modifiable risk and prognostic factor for glaucoma, but such an approach neither restores nor fully prevents RGC loss, resulting in irreversible loss of vision until blindness and neurodegeneration. Nowadays, studies need to better understand these mechanisms, which result in damage at both a trabecular meshwork and neuronal level. We are pleased to invite you to submit original research articles that highlight innovative findings on glaucoma neuroprotection or novel therapeutic approaches in its management from drug delivery to surgical options. The aim of this Special Issue is to provide an update on the key events underlying the pathogenesis of glaucoma and innovative neuroprotective strategies able to cure glaucoma, preventing adverse neurological effects..... We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
