Advances in Glaucoma Treatment

Message from the Guest Editor

Glaucoma is an optic neuropathy that is characterized by the death of retinal ganglion cells and leads progressively to loss of vision. Since intraocular pressure (IOP) is the only modifiable risk and prognostic factor for glaucoma, for over 100 years, the only treatment used for glaucoma was hypotensive eye drops. Since new pharmaceutical agents and minimally invasive techniques have been introduced in the past several years, however, at present, a great variety of treatment options is available for the best possible treatment of glaucoma. The primary objective of the present Special Issue is to illustrate the latest advances in the treatment of glaucoma, pharmaceutical or surgical, which could contribute to the easier, safer, and more effective management of glaucoma. Submissions are welcome primarily for original research articles showing innovative approaches for glaucoma treatment, from drug delivery to surgical options. Secondly, we will consider review articles of high interest and exceptional value.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
